

# Journey To The Planet Amazon

A game by:  
**Asa Perlman**

# The adventure continues...

**Project 3 (or part 2 of project 2), Journey To The Planet Amazon follows our unnamed hero, on their journey towards revolution! Tired of the constant checkpoints when coming and going from earth on their space traffic jammed commute to mars, one fateful morning they set off, bent on the destruction of the evil Bezonian empire.**

**Just like last time, you are pitted against the clock; as the orbit pulls you in, all you must do is stay alive long enough to reach your destination. Unlike last time however, the variety of enemies you will face has increased: stored in an array, and pulled at random, you will face not only delivery drones, but packages coming from left and right, along with... I haven't quite decided yet. Maybe some Blue Origin missile-rockets?**

**But wait, there's more!**

**Updated phazers with rapid-fire mode will require better collision detection and more sophisticated collision timing techniques.**

**-Animated collisions between elements will bring you deeper into the game.**

**A three stage boss battle with the emperor himself will employ a class containing a timer that speaks to a health bar (deciding fight or flight).**

**A fully responsive design will ditch all hard-coded values, making for a more reliable play experience across screen sizes.**

**& more stuff I'm too tired to fully conceptualize yet!!!**

**Stay Tuned!!!**

# The Story...

**You're on your way to work, on mars. You cannot afford your own fuel, so you decide to take the earth shuttle.**

**DANG IT!  
You've missed it!  
Well, guess you'll have to pick up a shift on planet Amazon instead :-)**

**Let's go!**

# continued...

**Reaching the boarder lbetween earth and outer space, something snaps. You can't take any more of this constant pop-up pestering! Let's go tell bezos where he can put his lousy job!**

**UH-OH!  
It appears they don't like it when you don't check in...  
Better move fast!**

**Better get those delivery kill-bots before they get you!**

# more continued...

**Looks like emperor Bezos has come to deal with you personally!**

**Will you let him capture you??**

**Or will you destroy him and make it behind enemy walls?!**
